

# "Think GibbsCAM First."

*2 & 2 1/2-Axis Milling,  
3-Axis Multi-Surface  
Machining, 4th &  
5th-Axis Advanced  
Milling, Rotary Milling,  
2-Axis Turning,  
Mill/Turn, and  
3D Solid Modeling*

Bill Gibbs  
President

## Of All PC-Based CAM Systems, GibbsCAM Was:

- FIRST with a Graphical User Interface
- FIRST with fully Associative Toolpaths
- FIRST Integrated Cut Part Rendering
- FIRST U.S. CAM system with Integrated Solid Modeling
- FIRST with direct machining of Solid Models
- FIRST with direct OPEN of SolidWorks® and Solid Edge data files

### THE WORLD LEADER IN

Shop Floor Programming  
sales to machine  
and control manufacturers

Since 1984, our goal has been to provide our customers with the most effective CAM programming system possible. Fundamentally, this means a program that is easy to learn, easy to use and powerful enough to solve any machining problem thrown your way.

In order to accomplish this, we've had to work with some of the world's most advanced computer technologies and do some pretty innovative programming and interface design. The results of those efforts have allowed our customers to stay at the forefront of manufacturing technology and ahead of their competition.

The challenge, of course, is to accelerate this pace of innovation, so that your continued success is assured. We've made that commitment, and it's why – if you're thinking of purchasing a PC-based CAM system – we encourage you to think GibbsCAM first.

To experience the true power and simplicity of GibbsCAM, call **1-800-654-9399 Ext. 5006**, for a **video or FREE demonstration**. Or visit us at [www.gibbsCAM.com](http://www.gibbsCAM.com).

# **GibbsCAM**®

Powerfully Simple. Simply Powerful.
